

## **School Philosophy**

*St. Paul the Apostle School exists as part of the Christian Catholic Community of Faith in Yonkers, New York. The goal of our school is to support parents and guardians who want the Christ way for their children, so that the children, motivated by love for Truth, may mature to responsible adulthood and contribute to the wholeness of the community.*

*We believe in the value of each individual student, based on the teachings of Jesus, as taught us by the Catholic Church.*

*Our basic purpose is to provide a well-rounded quality education, with emphasis on basic skills. We strive to give each student the tools necessary for spiritual, intellectual, emotional, physical and social growth.*

*We attempt to reinforce the work of God's Spirit by encouraging values that lead to the formation of good conscience, so that students will become responsible citizens, capable and willing to serve the community and the church when they reach adulthood.*

*With the belief that all people are God's children, we welcome all races, nationalities and creeds.*

*We work hand in hand, as a true community of faith, to become more aware of Christ's presence, so that our efforts may be mirrors of His love for others.*
